DESCRIPTION

Peptilux anti-wrinkle eye contour cream is enriched with functional active ingredients with a 'young look effect'. This product brightens and relieves eye contour fatigue, reduces puffiness, dark circles and wrinkles and improves the skin's microcirculation. Its special formula contains 'TIBOTOH-X™', an innovative peptide complex with a filler and plumping effect. With biomimetic peptide, which is endorphinic in nature and functionalized with an intelligent release system, our eye contour cream provides the skin with an endorphin rush and activates growth factors. It also exerts an anti-wrinkle, skin plumping and EGF-like skin repairing effect. The product is enriched with extracts and oils encapsulated in liposomes: - Cocoa Butter, which is antioxidant and anti-inflammatory; - Ascophyllum Nodosum extract, which stimulates microcirculation; - Grape Seed Oil, which is antioxidant and captures free radicals; - Chlorella Vulgaris Extract, which is antioxidant and improves skin microcirculation. DERMATOLOGICALLY TESTED

HOW TO USE

Apply a small amount of the cream to your eye contour, then massage gently from the outside towards the inside of the eye.

WARNING

If in eyes, wash immediately with water and get medical attention, if necessary. Avoid release to the environment. Avoid any accidental damage or incorrect handling that might cause product leakage. Store in a cool, dry place away from heat.
