DESCRIPTION

Peptilux 'shock action' eye contour cream with LIPHASYN™ features a synergy of wide-ranging anti-ageing actions, guaranteeing immediate results that last from 6 to 10 hours. Its formula, designed to reduce puffiness, dark circles and eye wrinkles in just a few minutes, is enriched with precious, high-performing ingredients: the patented LIPHASYN™ peptide complex acts like a natural filler, filling in wrinkles and plumping the skin of the eye contour area; Sodium Silicate, on the other hand, smoothes periocular wrinkles with its incredible immediate tensor effect. The combination of these and other precious ingredients acts on the causes and effects of skin ageing in a super-effective way, performing different but complementary actions. Wrinkle prevention: thanks to a synaptic mechanism inhibiting muscular contraction, the product limits the release of the neurotransmitters causing contraction and thus helps limit the unconscious micro-movements that accelerate the appearance of wrinkles. Action on external causes of wrinkle appearance: enriched with a Botox-like mechanism similar to that of botulinum toxin, the product helps reduce wrinkles by exerting a myorelaxant action on facial muscles. In fact, it helps to lift skin wrinkles by reducing muscle contractions, acting in depth. NB: clinical studies show that applying Peptilux twice a day helps improve the appearance of periocular wrinkles by 17% after just 15 days and 27% after 1 month of treatment. Action on internal factors causing wrinkle appearance: by means of an HA compensation mechanism, the product balances the reduced synthesis of hyaluronic acid due to ageing, thus helping to better retain water in the dermis and combating the appearance of wrinkles caused by dehydration. Instant action on wrinkles: Sodium Silicate, also known as Liquid Glass, enriches the product with its lifting and film-forming action. This ingredient, in synergy with the patented peptide complex in the formula, relaxes the treated area by "smoothing" periocular wrinkles, minimising puffiness and eliminating the "tired eye" effect. DERMATOLOGICALLY TESTED

HOW TO USE

Apply a small amount of cream, equivalent to a coffee bean, and pat it onto the eye contour area. Massage from the inner corner of your eye, working your way towards the outer corner, avoiding facial movements and remaining expressionless. Do not apply the product to eyebrows and areas where hair is present. Once the product has been applied, use a fan or a hair dryer with cold air. The airflow acts on the product by accelerating, improving and enhancing its effects. Keep using them for at least 2-3 minutes until completely absorbed.

WARNING

Discontinue use in the event of any skin redness or irritation.

INGREDIENTS (INCI)

LIPHASYN™: Aqua, sodium silicate, magnesium aluminium silicate, glycerin, caprylyl glycol, pentapeptide-18, acetyl hexapeptide-8, lactic acid, pseudoaltermonas ferment extract, xanthan gum, potassium sorbate, phenoxyethanol, ethylexyglycerin, citric acid, CI77492, CI77491, CI77499.

PAO DEADLINE

6 Months
